Cooking Range 2022

Create delicious
tastes, effortlessly

Swedish thinking. Better living.

A kitchen that knows what matters

At Electrolux, our philosophy is simple: life in the kitchen should be seamless and intuitive.

That's why we've developed a new range with smart, sustainable features and clean lines for an effortless experience. So, you can concentrate on the things that make you happy: making and sharing great food with the people you love.

**Swedish thinking.
Better living.**

Cooking

Effortless cleaning with SteamClean hood

SteamClean technology makes light work of a once tedious chore. Simply press one button and the hood injects steam to clean all the hard to reach places inside the chimney. By effortlessly removing stubborn grease and grime, the cooker hood maintains efficient air flow to provide you with a more pleasant cooking and dining experience.

Lower your utility bills with UltimateTaste gas hobs

The blue flame burns efficiently to turn up the flavours faster, whilst also keeping your energy costs down.

Dishwashing

Our range of quiet, fuss-free dishwashers offer superb results – sparkling dishes, ergonomic stacking and swift cycles, keeping your favourite dishware beautifully clean.

Next -level baking with SteamBake ovens

With SteamBake, you can create bakery-style bread in your own home. The added steam allows dough to rise more effectively than conventional heating. The steam helps to create an exquisitely soft centre, while the combination of hot air delivers deliciously glossy crusts.

A step in the right direction

StepFlame delivers precise control to three rings of flame with stepped settings that click into place as you change the heat intensity. The pre-defined settings guarantee the same flame and heat level every single time, giving you both control and flexibility. This is perfect for a variety of techniques and dishes from delicately melting chocolate in a bain-marie, to gently simmering sauces or stir-frying rice at high temperatures.

High power. Intense flavour.

The high-power burner provides intense heat and a steady flame exactly when you need it most. This is perfect for stir-frying when a very high temperature is needed to lock in the texture and flavour of crunchy vegetables or fried rice.

*Selected models

Extra efficient. Extra tasty.

FlameShield trivet efficiently channels intense heat to the cooking process with less heat loss.

Hobs

Gas Hobs

The curved trivet profile works like cradling a candle, cupping the flame and channeling the energy directly onto the bottom of the pan. By directing heat more efficiently, our FlameShield trivet cook tops cook faster and consume less energy

Induction Hobs

The coolest way to hob cook, induction is just like cooking by magnetism - heat is only activated when there is a pan on the hob, and it's instantaneous; which means induction cooking is faster than gas, more energy efficient, and also more controllable.

Ceramic Hobs

Engineered to heat up rapidly, our ceramic hobs guarantee you precise heat selection, coupled with Electronic Touch Controls and easy-to read LED displays.

Gas Hobs

Features

StepFlame settings deliver precise heat control.

StepFlame delivers precise heat control to help you perfect a variety of techniques and dishes.

FlameShield improves efficiency and results.

FlameShield trivet efficiently channels intense heat to the cooking process with less heat loss.

High power burner is ideal for stir-frying.

The high power burner is ideal for stir-frying crunchy vegetables and tasty rice or noodles.

Flame failure cuts off gas supply for your safety.

Flame failure safety device automatically cuts off the gas supply if the flame goes out.

Flexi cut-out for easy kitchen installation.

Easy installation into existing kitchen counter cut-outs without additional modifications.

Pancake setting for pancake perfection.

Pancake setting delivers even heat distribution to cook pancakes perfectly every time.

Durable, easy-to-clean tempered glass surface.

The tempered glass surface makes it easier to clean burnt-on grease and grime.

Blue Flame

The blue flame burns efficiency to turn up the flavours faster, whilst also keeping your energy costs down.

Sensor cuts off the flame to prevent burning.

A sensor embedded in the burner cap recognises when the temperature is getting too hot and automatically shuts off the flame to prevent burnt food and fire hazards.

StepFlame settings deliver precise heat control.

StepFlame delivers precise control to three rings of flame with stepped settings that click into place as you change the heat intensity. The pre-defined settings guarantee the same flame and heat level every single time, giving you both control and flexibility. This is perfect for a variety of techniques and dishes from delicately melting chocolate in a bain-marie, to gently simmering sauces or stir-frying rice at high temperatures.

The FlameShield trivet reduces heat-loss to deliver more intense heat to the cooking process, for effortlessly perfecting dishes from soups to sauces to stir-fries. The curved trivet profile works like cradling a candle with your hands, cupping the flame, and channelling the energy directly onto the bottom of the pan. By directing heat more efficiently, hobs with the FlameShield trivet cook faster and consume less energy than previous models*, helping you to achieve quick, tasty meals, whilst also lowering your energy bills over time.

*Lower gas consumption to bring 2L water to boiling point - comparison vs. previous model EGT9239CKB carried out in internal testing.

High power. Intense flavour.

The high-power burner provides intense heat and a steady flame exactly when you need it most. This is perfect for stir-frying when a very high temperature is needed to lock in the texture and flavour of crunchy vegetables or fried rice.

Safety shut-off

The flame failure safety device automatically cuts off the gas supply if the flame goes out during cooking. This means you can use your appliance at the lowest power without worrying about the flame extinguishing and leaking gas.

Easy installation

The smaller lower box of this cooktop combined with the extended glass overhang and flexible bracket makes installation into existing counter cut-outs easy without additional modifications.

Sturdy and stable

Sturdy cast iron supports ensure that your pots and pans are stable while cooking.

Effortless cleaning

The flat tempered glass surface makes it easier to clean burnt-on grease and grime to speed up the cleaning process after cooking.

Pancakes made to perfection

Take your pancake flipping skills to the next level with our pancake setting. Delivering even heat distribution between the inner and outer flame so you can experience evenly cooked, smooth, delicious pancakes - made to perfection.

A premium European-Engineered design gas hob that has unique square trivet, high heat efficiency and steady blue flame for efficient cooking ensuring delicious result everytime you cook.

Square trivet

Blue flame burns efficiently to lower energy cost.

The blue flame burns efficiency to turn up the flavours faster, whilst also keeping your energy costs down.

High power burner is ideal for stir-frying.

The high-power burner provides intense heat and a steady flame exactly when you need it most. This is perfect for stir-frying when a very high temperature is needed to lock in the texture and flavour of crunchy vegetables or fried rice.

Flame failure cuts off gas supply for your safety.

The flame failure safety device automatically cuts off the gas supply if the flame goes out during cooking. This means you can use your appliance at the lowest power without worrying about the flame extinguishing and leaking gas.

Flexi cut-out for easy kitchen installation.

Flexible bracket makes installation into existing counter cut-outs easy without additional modifications.

Semi-rapid burners for cooking with low heat.

Semi-rapid burners are ideal for dishes like soups and stews that require lower, more gentle temperatures to perfect. Select a low simmering heat to bring out the best textures and flavours.

Cast iron supports keep pots and pans stable.

Sturdy cast iron supports ensure that your pots and pans are stable while cooking.

Induction hobs

Induction hobs are easy to keep clean. The smooth ceramic surface can be quickly and effortlessly wiped clean, while spillages cannot burn because the area surrounding the pots stays cool. No need to guess which pot you can use - if a magnet sticks to the bottom of the pan, it works.
